EDUCATION

Master degree - Computer Science
University of Debrecen Faculty of Informatics - Present

Bachelor degree - JAVA JEE & Mobile Application
Université Hassan 2 Faculty of Sciences Ben M'sik - 2023

Specialized Technician Diploma - Computer Development
Specialized Institute of Applied Technology - 2022

Bachelor's Degree - International Baccalaureate with French and Physics option.
Annexe AL MAJD - 2020

PROFESSIONAL EXPERIENCE

Front end Developer
ASATechno Consulting   (05/2024 - 06/2024) Kenitra

As a Front-End Developer, I worked for two months on web development projects using ScalaJS integrated with ReactJS, I also utilized LESS for styling and contributed to improving the codebase by fixing bugs.

- Collaborated on projects using GitHub for version control and code integration.
- Fixed bugs related to the front-end part.
- Developed with ScalaJS integrated with ReactJS.
- Worked with Linux as the operating system.
- Utilized PL/SQL for database management.

Skills : HTML, React JS, Scala JS, CSS. Less, JS, GitHub, API REST, Linux, Figma, Eclipse, VS code, MySQL

Junior Software Engineering
Liferay (08/2023 - 01/2024) Mohammedia

Junior software engineer, passionate about programming and problem-solving. Seeking continuous learning and eager to contribute proactively to innovative projects. Emerging skills in software development and commitment to technical excellence.

- Utilizing the Scrum methodology on JIRA for task allocation.
- Bug fixing on the website, particularly on the front-end.
- Creating scenarios to test the platform.
- Using GitHub to merge our project and send pull requests to our manager.
- Utilizing ReactJS, Bootstrap, and APIs developed by Liferay (API Builder) for frontend development.
- Managing the database with MySQL.
- Making backend adjustments using JAVA.
- Using Figma for design.
- Using Docker for platform versions of Liferay.
- Working in the Linux Fedora environment as the operating system.
- Daily meetings (daily standups).
- Bi-weekly 1-1 meetings with our manager in Spain to discuss our developments and assess our progress in development.

Skills : CSS, HTML, JS, React, Bootstrap, GitHub, Liferay, API REST, JIRA Scrum, Docker, Linux, Figma, JAVA, Eclipse, VS code, Jenkins, MySQL, tomcat, OSGI, Elasticsearch

Software Tester
LOGYTalks 12/2022 - 07/2023   Casablanca

Software tester, I have worked closely with development teams to optimize the testing process. My passion for detecting anomalies and continuous improvement results in robust and reliable final products.

- Testing the platform using the Robot framework.
- Scraping emails via LinkedIn using Python and scraping tools.
- Presenting our platform to clients to guide them on its usage.
- Creating documentation for our site.
- Proposing new features.
- Assigning tasks to a team in India and ensuring follow-up.
- Analyzing the platform.
- Creating ads on Facebook and Twitter.
- Using Google Analytics for website analysis.

Skills : Robot Framework, Python, English, Documentation google analytics

Full Stack Developer

CloudLink   (04/2022 - 10/2022)   Casablanca

During my experience in website creation within a team of 12 developers, we used the following tools:

- Jira Scrum for task and project allocation.
- GitHub and GitKraken for collaboration on code.
- Daily meetings to ensure effective communication.
- Creating the specifications document, including class, sequence, and use case diagrams.
- Using Figma and AdobeXD to track website design.
- Frontend technologies used: React JS, React Admin, JavaScript, TypeScript, Tailwind.
- Backend technologies used: Node JS, MongoDB.
- Using AWS (Amazon Web Services) services such as Cognito for authentication, DynamoDB for database storage, and an EC2 instance for deployment.

Skills : CSS, HTML, JS, React, Tailwind, GitHub, API REST, JIRA Scrum, Figma, VS code, MongoDB, Merise, UML, TDD, EC2, DynamoDB, Lambda functions , Cognito, S3 buckets, CI CD

SKILLS

Front-End
HTML / CSS / JavaScript
ReactJS / React admin
Tailwind / bootstrap / SASS

Database
SQL Server / MySQL / Oracle / MongoDB

Web Services
API Rest

Modeling
Merise / UML

Version Control
GitHub

Operating Systems
Windows / Mac OS / Linux

Tools
Eclipse/ visual studio/ JIRA /
Confluence / CI CD / JENKINS

Methodology
Agile / Scrum

Software
Docker

CERTIFICATE

React / React js

React: Software Architecture
React.js: Building an Interface
React.js Essential Training

SQL

SQL (Basic) Certificate
Certified SQL de Sololearn
SQL Essential Training

GitHub

Introduction to Git
and GitHub

Microsoft Office

Microsoft Office Specialist
for Office Excel® 2016
